

WP SERIES / OVERVIEW

WP Series

Vacuum Membrane Press Models

How WP1, WP2 and WP4 work, their advantages and applications

Professional vacuum membrane press systems, from single-table to multi-table solutions.

WP1

1 WORKTABLE

Vertically moving heating system.

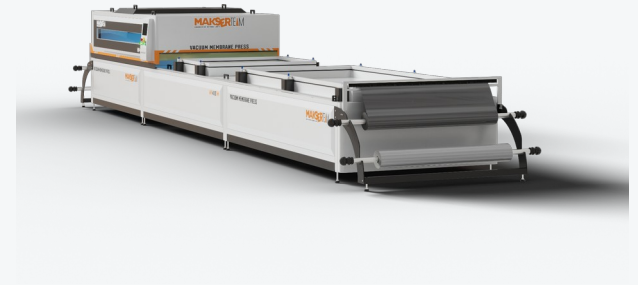

WP2

2 WORKTABLES

Laterally moving heating unit.

WP4

3 WORKTABLES

Foil waste advantage with a smaller central table.

All models can be customised on request to meet customer requirements.

WP SERIES / WP1

WP1 Model

Single worktable

Vertically moving heating system.

APPROXIMATE OVERALL LENGTH

4,320 mm

Including PVC foil roll holders

1 Key Facts

1 worktable.
The heating unit does not move side to side.
It moves vertically using a hydraulic system.

2 Space Advantage

The single-table design takes up less space. It is an ideal solution for customers with limited workshop space.

3 Custom Manufacturing

Dimensions and the working area can be customised on request to meet customer requirements.

WP SERIES / WP2

WP2 Model

Two worktables

Laterally moving heating unit.

APPROXIMATE OVERALL LENGTH

7,620 mm

Including PVC foil roll holders

Table 1

Table 2

1 Key Facts

2 worktables.
The tables are stationary.
The heating unit moves from side to side.

2 How It Works

While coating takes place on one table, new parts can be loaded onto the other table to save time.

3 Custom Manufacturing

Dimensions and the working area can be customised on request to meet customer requirements.

WP SERIES / WP4

WP4 Model

Three worktables

A smaller central table and a flexible production flow.

APPROXIMATE OVERALL LENGTH

10,920 mm

Including PVC foil roll holders

Table 1

Table 2

Table 3

1 Key Facts

3 worktables.
1 moving heating unit.
The second worktable is smaller.

2 Foil Waste Advantage

The smaller central table reduces foil waste when coating small batches of compact cabinet doors and components.

3 Space Requirement

The three-table arrangement offers higher capacity but requires a longer installation area in the workshop.

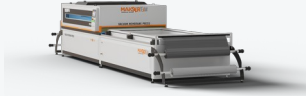

4 Custom Manufacturing

Dimensions and the working area can be customised on request to meet customer requirements.

WP SERIES / COMPARISON

Model Comparison

Key differences between WP1, WP2 and WP4

Key differences	WP1	WP2	WP4
WP1 / WP2 / WP4			
Worktables	1	2	3
Heating unit movement	Up and down	Side to side	Side to side
Main advantage	Saves space.	Saves production time.	Reduces foil waste on small parts.
Approximate overall length (including PVC foil roll holders)	4,320 mm	7,620 mm	10,920 mm

General Note All models can be customised on request. WP2 has no small central table. WP4 has a more compact second worktable to help reduce foil waste when coating small components in low quantities.
